Trips by Weekday for Each Hour

If we look at trips by the hour of the day, it is safe to assume that weekday riders use Bikes to commute to and from work, with peak hours from 7–9 AM and 5–7 PM. Most weekend rides occurring in the mid-afternoon hours. In general, bikes are used on weekdays more than on weekends.

Different gender groups follow the same usage pattern with more male users than other genders.

Trips by Gender (Weekday per Hour)

Bikesharing

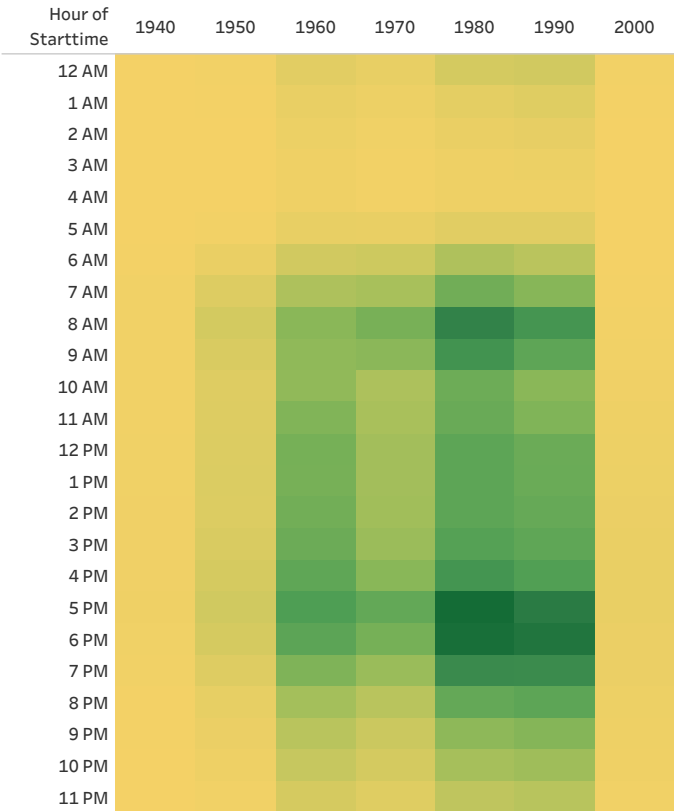

Age analysis shows that the average user is born between 1980 and 2000 for male and female genders. There is an outlier in an unknown gender group for the 1960-1970 years that require further analysis.

Trips by Age

Birth Year (bin)	Female	Male	Unknown
1940	2,767	8,452	23
1950	22,338	71,854	500
1960	65,369	185,509	208,855
1970	83,337	266,740	2,739
1980	198,059	523,176	7,022
1990	207,363	447,689	5,749
2000	7,619	22,489	403
